

KAIZEN GLOBAL EARNINGS DISCLAIMER

General Disclaimer

At Kaizen Global we make every effort to ensure that we accurately represent our products and services and their potential for income. Earning and Income statements made by our company and its customers are estimates of what we think you can possibly earn. There is no guarantee that you will make these levels of income and you accept the risk that the earnings and income statements differ by each individual, you further accept that all of our products are merely educational and designed to educate you via real life examples. As with any business, your results may vary, and will be based on your individual capacity, business and trading experience, expertise, and level of desire. There are no guarantees concerning the level of success you may experience. The testimonials and examples used are exceptional results, which do not apply to the average purchaser, and are not intended to represent or guarantee that anyone will achieve the same or similar results. Each individual's success depends on his or her background, dedication, desire and motivation. There is no assurance that examples of past earnings can be duplicated in the future. We cannot guarantee your future results and/or success. There are some unknown risks in business and on the internet that we cannot foresee which can reduce results. We are not responsible for your actions.

Risks Associated with Forex

Trading foreign currencies can be a challenging and potentially profitable opportunity for investors. However, before deciding to participate in the Forex market, you should carefully consider your investment objectives, level of experience, and risk appetite. Most importantly, do not invest money you cannot afford to lose.

There is considerable exposure to risk in any foreign exchange transaction. Any transaction involving currencies involves risks including, but not limited to, the potential for changing political and/or economic conditions that may substantially affect the price or liquidity of a currency. Investments in foreign exchange speculation may also be susceptible to sharp rises and falls as the relevant market values fluctuate. The leveraged nature of Forex trading means that any market movement will have an equally proportional effect on your deposited funds. This may work against you as well as for you. Not only may investors get back less than they invested, but in the case of higher risk strategies, investors may lose the entirety of their investment. It is for this reason that when speculating in such markets it is advisable to use only risk capital.

Risk Disclaimer for Forex Trading

Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. Past performance is not indicative of future results. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

Benefits and Risks of Leverage

Leverage allows traders the ability to enter into a position worth many times the account value with a relatively small amount of money. This leverage can work with you as well as against you. Even though the Forex market offers traders the ability to use a high degree of leverage, trading with high leverage may increase the losses suffered. Please use caution when using leverage in trading or investing.
